

Lighten Your Load with a Timberwolf Conveyor!

No firewood processing operation is complete without a conveyor. Timberwolf conveyors cut loading time and save on manpower.

Optional Chip Separator

Optional Chip Separator

Our Commercial Grade Firewood Conveyors are available in 20', 24', and 26' lengths. These self contained work-horses feature 18" wide two ply polyester Rough Top™ belting which slides over continuous strips of polyurethane. The result - a low friction system that increases handling capacity and improves belt life. The rough top belting is available with optional 1" T-cleats to provide positive transport even in extreme weather conditions. Commercial grade firewood conveyors are available as belt drive or hydraulic top drum drive, and can be set up to run off the processor hydraulic system. The conveyors also feature:

- High speed DOT approved wheels and tires
- 2" ball coupler
- 5.5HP OHV Honda gas-powered engine

Our 30' conveyors (see other side) feature All steel construction.

C30 HD Conveyor

Optional Hydraulic Lift

Why load firewood by hand when you can increase production - and profits- with a Timberwolf All Steel Professional Grade Firewood Conveyor? Our 30' conveyors will last for generations - it's the last conveyor you'll ever need to buy. Timberwolf's professional grade C30 HD firewood conveyors feature hydraulic top sprocket drive, and can be set up to run off the processor hydraulic system. Hydraulic driven conveyors allow the operator to stop the conveyor and back it up for easier handling of large diameter logs needing to be resplit. Built to Timberwolf's rugged quality standards, the 30' conveyors feature:

- All Steel construction
- 26" wide conveyor
- Heavy Duty Axle with electric brakes
- 5.5HP OHV Honda motor
- High speed DOT approved wheels and tires
- 2" ball coupler

Every Timberwolf conveyor is built to order, in Vermont, right in our own plant.

All conveyors can be configured to run off processor hydraulics!

The wood is pushed up the steel trough by 1" square steel cleats attached to a drive chain. This system is extremely durable and efficient.
